

Evie Perren

Profile

Full stack Software Engineer specialising in Front-end development currently working in a Agri-Tech SAAS start-up based in London.

I thrive working in a fast paced environment with opportunity to grow and strength my skills. I am looking for a position that offers challenge and fulfilment through ambitious business goals, and one that nurtures personal development.

With a strong passion for problem solving and over 4 years experience, I have learnt build maintainable features to complex challenges to a high quality, following best practices and delivering within the required deadline.

Since August 2018, I have dedicated by free time to strengthening my skills to be more of an asset to my team. In 2020, I passed an apprenticeship with Firebrand, receiving a Level 4 Software Developer accreditation (equivalent to first year of Bachelor's degree programme).

As a side project to strengthen my skills, I have been working on building a React Native Fitness app. This includes developing and maintaining a Postgres database and Express APIs to retrieve the data.

Education

- MTA Database Fundamentals
- MTHTML5 Microsoft Specialist: Programming with HTML5 with Javascript and CSS3 - Level 4 Software Development Diploma

Andover College 2016 - 2018

- I received B (Psychology), C (Law), D (Traditional mathematics)

Skills

Javascript, React, React Native, Nuxt JS, Typescript, Jest, Virtuoso, Fastify, ExpressJS, OpenAPI Backend, Virtuoso, RavenDB, Software development life cycle (SDLC), HTML, CSS, Agile development, Search Engine optimisation (SEO), Adobe Experience Manager (AEM), Prismic, NodeJS, NextJS, Git, MongoDB, NPM

46 Altona Gardens, Andover,
SP10 4LG,
United Kingdom

Experience

Full Stack Software Engineer - *Hectare*

DECEMBER 2022 - PRESENT

Following a promotion in December 2022, I took in further responsibility within the team. This included bringing forward new ideas and executing them to ensure a stable platform as the product usage continues to grow. I have built a strong relationship with stakeholders with the company, collaborating to solve complex issues our users face on a regular basis. This in turn has helped me build knowledge on problem solving and creating simple solutions to complex problems.

Full Stack Software developer - *Hectare*

SEPTEMBER 2021 - DECEMBER 2022

In order to expand my knowledge, I joined the Argi-Tech SAAS start up in September 2021. In this role, I learnt to work at a fast pace, delivering high quality features to a green field user base. This required strong communication and prioritisation skills to achieve the best product within strict and short timeframes. Within this role, I transitioned my knowledge to work with NuxtJS on Front end, and MongoDB with Express on the Back end.

Junior Software Developer - *Simplyhealth*

SEPTEMBER 2020 - SEPTEMBER 2021

Following the completion of my apprenticeship, I became a Junior Software developer. This role entails converting requirements from stakeholders around the business into highly functional working code. I contribute to BAU tasks such as improving the functionality within Simplyhealth's CMS (AEM), increasing Accessibility and functionality throughout our web estate and building projects to the highest quality using SOLID and DRY principles. I am also the Lead developer on Interaction studio, which allows our marketing team to provide personalised journeys throughout the customers experience with Simplyhealth.

Apprentice Software Developer - *Simplyhealth*

MARCH 2019 - SEPTEMBER 2020

I completed my apprenticeship with Firebrand in September 2020, following 2 exams (MTA Database Fundamentals, MTHTML5 Microsoft Specialist: Programming with HTML5 with Javascript and CSS3) as well as meeting a list of criteria on projects within my work-place. For example:

- - 1.1ci: Stakeholders: Understanding who they are and what their 'stake' is
- - 6.1d: Can apply reconcile design against analysis models

- - 6.1e: Can design software solutions to meet requirements
- - 7.1a: Can take a variety of data and business requirements and convert them into basic analysis artefacts to understand and can clarify the intended use of the proposed software
From my apprenticeship, I was able to learn hands-on skills to increase my knowledge of software development and become actively involved in all BAU tasks within Simplyhealth.

Customer Contact Advisor - *Simplyhealth*

NOVEMBER 2017 - MARCH 2019

As a Contact Advisor, I spoke to customers over the phone, LiveChat and email to deal with their complex queries. My role was to understand their concerns with their product and establish a satisfactory outcome. This required organisation, working to resolve issues swiftly and in alignment with our regulations.

Customer service assistant - *Sainsbury's*

AUGUST 2016 - NOVEMBER 2017

At Sainsbury's, I developed further relationship skills by serving customers and representing the company. I take being a face of the business seriously.

Customer service assistant - *Sports Direct*

SEPTEMBER 2015 - AUGUST 2016

This required face-to-face interactions with customers assisting them with their queries and seeking resolution. Being customer facing, I was polite and respectful.
